- Straight side walls for semi-permanent usage
- Good storage and flexible logistics
- Fans and ventilation systems available
- Various types of gates and personell entrances
- Quick installation
- Lightweight construction
- Double coated high strenght PVC fabric

Large storage capacity

NG5 suits your requirement for temporary or permanent storage or production location in most environments. The lightweight prefabricated construction is made of fire resisting and UV-protected PVC-fabric and high quality galvanized steel. We can offer supervisors or full technical teams for construction and dismantling on short notice. Our in-house engineering department can adapt all Giertsen halls to your needs, as well as local requirements and building regulations. Folding gates, windows, inner lining, insulation, heating, cooling, various colours, etc. are optional according to your needs. Safe and rapid installation.
